Sanctions are attached for Rs 32000/- for providing a Sand filter to the water supply of Kolar town, the other improvements to be made to be taken up later on as funds permit

M K Jain
28/4/28

Extract from the Dewan's reply to the address presented by the Kolar Municipal Council.

I am glad to see that you have already got a scheme of water supply in operation for the town but the system that you enjoy the benefit of is no doubt a very antiquated and unsatisfactory one and His Highness' Government have every sympathy with your desire to have a supply of filtered water and a main from the tank which will not be liable to contamination

As regards the finances, I notice that your budget runs on the slender figure of about Rs 27000 in receipts and perhaps a little more than that sum in expenditure It does not appear therefore that in the near future you will be able to yourselves finance any scheme ~~of water supply~~ which will give an improved water supply and also give you, later on, a satisfactory scheme of drainage But as you know, when His Highness' Government initiated the Local Self-Government scheme six years ago, they made a promise in those days when they were & in a prosperous condition, that they would give half the cost of all such schemes in municipal towns. The question is how we should go about it I understand that it will probably cost for the immedtate improvements in respect of a sand filter system) I suppose you will be satisfied with that for the present - a sum of about Rs. 25000. (If you are satisfied in the immediate future with a modest scheme of a sand filter for the supply of water that comes to you town under the existing system at a cost of between Rs.25000 and Rs.30,000, I shall be indiscreet and promise you that next year the Government will contribute a half of that sum)

41. From The chief Engineer for Irrigation
No B 2605 dated 5 9 23

With reference to sl 15, forwards for sanction an estimate amounting to Rs 32,000/- for improving water supply to Kolar Town. The estimate has been countersigned by the president, City Municipal Council, Kolar.

24 In sl 15, the chief Engineer was requested to submit a scheme costing between Rs 25000 and Rs 30,000/- for the water supply to Kolar Town. The present estimate amounts to Rs 32000/- ~~comprising works of the first stage~~

25 Submd for orders.

5)
7/9/23

26) The present estimate is only for the partial improvement of the water supply system and will ensure a filtered supply of water to the town. A complete satisfactory improvement of the system would cost Rs 87,000
Two important works viz replacing the open supply channel by a covered masonry duct or pipe line and (2) duplicating the main from the Service Reservoir costing in all about Rs 49000 are proposed to be given up for the present on account of paucity of funds. The Ex Engr

NOTE—Contn. sheet

Serial No

Considers that the first of these two items is the foremost of all the improvements necessary, as therein the water is liable to contamination. The second item of work also will have soon to be taken up as the Sc Engr states that the present delivery main of 5" is in to cope with the demand and that a single 9" main is the least size required in its place. There will thus be a necessity in the near future for sanctioning these two items of work also and to find resources for financing them.

2) As the open earthen supply channel is said to be highly objectionable from a hygienic point of view, it seems to be necessary to consult the Sanitary Commr in the matter. The Sanitary Board has not also been consulted and it seems to be necessary to obtain the opinion of that body also before sanctioning the estimate.

3) The resolution of the Mel Cl refers to a detailed estimate for the construction of a tank somewhere in the higher zone to facilitate easy flow in that area and the Chief Engr states that the question of having a balancing tank higher up will be taken up during the execution

FIRST
Final Note by the ~~Second~~ Member of Council

Subject —

IMPROVEMENT OF WATER SUPPLY TO KOLAR TOWN.

In an address presented to the Dewan during his tour in August 1922, the Town Municipal Council of Kolar urged the pressing need for an up-to-date and sound system of water supply to their town and as they were unable to carry out any scheme in the matter from their slender resources, they requested that the Government may give them a grant and a loan, if necessary, for the purpose. The Dewan in his reply promised a Government contribution of half the cost of a project for providing a sand filter for the existing supply of water at a cost of between Rs. 25,000/- and Rs. 30,000/-, if the Municipal Council would be satisfied with such a modest scheme.

2. The Municipal Council subsequently agreed to bear a moiety of the cost of providing sand filters and solicited sanction to raise a loan of Rs. 15,000/- at 7 per cent interest per annum on a Government guarantee for meeting their quota of the cost of the scheme interest being payable half yearly and the loan repayable in 15 years with option to the Municipal Council to pay it up after 10 years at six months' notice.

3. The Financial Secretary who was consulted in the matter noted as follows -

> "The amount is too small to be raised by a public loan. It may be advanced by Government on the same conditions as are proposed for the public loan. Annual interest at 7 per cent and repayment at not less than Rs. 1000/- per year may be required. The toll revenue may be set aside for this purpose and any deficiency in it for meeting these demands required to be made good from the other resources of

the Municipality. Government have given a grant-in-aid, and if the balance required is given as a loan by them the work will be undertaken and completed soon."

4. I agreed with the Financial Secretary in his views and with the Dewan's approval orders were issued in Government Order No. L. 425-6 dated the 17th July 1923 sanctioning a loan of Rs. 15,000/- on the conditions mentioned by the Financial Secretary.

5. The Chief Engineer who was asked to prepare a scheme for the sand Filter states that in order to improve the whole system of water supply and put it on a thoroughly satisfactory basis, it will be necessary to carry out the marginally noted works at a cost of Rs. 87,000/- that the work can be completed in about 18 months if the Municipal Council can finance the scheme and that if it is not possible to find funds immediately, the expenditure may be spread over 2 or 3 years, the work being taken up in stages. For the 1st stage it is proposed to carry out all the items of work referred to above except items Nos. 2 and 6, at an estimated cost of Rs. 32,000/-, and it is reported that this will ensure a filtered water supply to the town and that the work could be stopped at this stage if funds are not available. The estimate for Rs. 32,000/- has been approved by the Municipal Council.

	Rs
1. Roughing filters round the sluice at the tank intake	1,760
2. Covered masonry duct or pipe line.	24,060
3. Improvement to the carthon settling tank	390
4. Three Filter-beds.	22,070
5. Improvement to service Reservoir.	3,804
6. Duplicating main from Service Reservoir and improvement to distribution.	25,000
7. Unforeseen charges	800
Total	77,884
Add 10½% charges for establishment and Tools and Plant ...	8,177
Total	86,061
or Rs 87,000 in round figures	

(14

6. I am of opinion that the present estimate for Rs. 32,000 may be sanctioned. The extra sum of Rs. 2,000/- may be easily found by asking the Municipal Council to contribute a moiety of it, the Government bearing the other half.

7. The Government share of half the cost of work will be met - from the provision for the improvement of water supply in the towns under "30 Grants for Public Improvements" in the current year's budget.

8. I submit the estimate for Rs 32,000/- for His Highness' gracious sanction.

Bangalore,
22nd September 1923.

No. Ml 99/[illegible] Office of the Deputy Commissioner,
Kolar District
Dated, Kolar, the 9th April 1923.

From

S Firiannaiya, Esquire, M.A., B.L.
Deputy Commissioner, Kolar District.

To

T. V. Jeyarama Aiyar, Esquire M.A., B.L.
Secretary to the Government of Mysore
Revenue Department, Bangalore

Ml 15-22—38

Sir,

Adverting to your Memo No I 3274 dated 28th October 1922 forwarding copy of your letter No.L. 3273 Ml 15-22-15 dated 28th 11 22 to the Chief Engineer for Irrigation in Mysore, Bangalore, re the improvement of the water supply in Kolar Town I have the honour to forward herewith copies of letter No 891/28 2 23 with its enclosures received from the President, Kolar Town Municipal Council in the matter of financing the Project and to state that I cordially concur in the view of the Municipal Council to raise a loan on a Government guarantee of Rs 1[illegible],000/- at 7 % repayable in 10--15 years for meeting the quota of the cost of the scheme It is possible that the final estimate may exceed Rs 30,000/- and that the moiety which the Municipality will have to bear may be proportionately higher but this is not likely to occasion any serious difficulty as the Municipality will be able to meet the extra cost They have arranged to have a sinking fund for discharge of the loan and have also been taking active steps to augment their resources in order to meet the interest and other charges

I therefore request you to be so good as to obtain the very early sanction of Government to the proposal of the Municipal Council for the grant of a loan of Rs.15,000/- on the terms and conditions proposed in the resolution. The Chief Engineer, Bangalore may also be invited to expedite the execution of

(23)

Letter No. 891/28.2.23 from the President, Kolar Town Municipal Council to the Deputy Commissioner, Kolar District.

--

With reference to your docket No.C1 66 of 16th November last and subsequent reminder No P. 99 of 6th instant re: the scheme of sand filter for the supply of water to the Kolar town, I have the honour to state that the subject and the note drawn up by Mr B Sreenivasa Iyengar Treasury Assistant Commissioner, Kolar, on the subject were placed before the Municipal Council in its meeting held today and the proposals in the note touching this subject (copy of which is herewith sent for reference) were - - - - generally approved by the Municipal Council.

2. It was resolved that a loan be raised on Government guarantee, of Rs 15,000/- carrying interest at 7 % per annum and repayable in 15 years with an option to the Municipality to pay up after 10 years at 6 months notice interest being payable half yearly

3 It was further resolved that the Government be requested to accord sanction to the levy of tolls from 1st July 1923, as the Municipal Council intend to provide for interest and sinking fund on the proposed loan out of income from tolls

4 A copy of the resolution on the subject is herewith appended for reference.

5. I request you to kindly obtain the sanction of Government to the above proposals as early as practicable, in order to enable the Municipal Council to take necessary further action. A copy of the draft prospectus for raising the loan will be prepared and submitted for sanction if the proposals for financing the scheme as suggested by the Municipal Council is sanctioned by Government

7. Read Deputy Commissioner's No LL. 99/22-23 dated 6 2 23, re the financing of the project of sand filter for the improvement of water supply to the town and the note prepared by Mr. B Sreenivasa Iyengar Treasury Assistant Commissioner on the subject which has been previously circulated to all the Municipal Councillors

Resolution That a loan be raised of Rs 15,000/- to be repayable in 15 years with an option to the Municipality to pay up after 10 years with giving 6 months' notice at 7 % per annum interest payable once in half year

Proposed by Mr Bapu Rao and seconded by Mr Srinivasa Char

Ammendment.

Mr. B. Muninarayanasetty proposes for the enhancement of the interest by ½ per cent more i.e, 7½ per cent per annum. Mr Chikkachennanjappa setty seconded the proposition. Ammendment lost and original proposition put forward and carried 10 votes for, 7 against, and further it was resolved that the Government be requested to accord sanction to the levy of tolls from 1st July 1923 if not earlier

---

C o p y

Deputy Commissioner
Kolar District

NOTE NOW ON FINANCING THE PROJECT FOR IMPROVEMENT
TO KOLAR WATER SUPPLY FOR CONSIDERATION IN COUNCIL IN
JUNE MEETING ON 24th FEBRUARY 1923.

1. The question of supplying good filtered water to the Kolar Town is an all important one and it is necessary to dwell on the Administrative side of it. NNOr is this the place for considering the technical aspect of the project. In his reply to the address presented to the Dewan Saheb by the Municipal Council of Kolar he very kindly promised support to getting through the scheme of supplying filtered water provided the Municipal Council contributed a moiety of its cost.

2. As pointed out by the Deputy Commissioner in his letter dated 9-2-23 it now remains for us to seize this occasion and strain every nerve to provide at once the Municipal share and to arrange to place it at the disposal of Government, when demanded. Otherwise our more opportune brethern will have all the benefit of the promised concession and we will have to make wry faces then.

3. The actual cost of the project is not known, but for the present purpose, it may be roughly taken at Rs30,000 and the Municipal quota at Rs15,000.

4. The normal annual income of the Municipality based on the accounts of 1921-22 is roughly Rs20,000 and the normal expenditure Rs23 000 resulting in an excess on the wrong side of Rs3,000 due mainly to the considerable drop in octroi revenue in recent years consequent on the slackness in trade. The minimum closing balance should be Rs6,000. The present cash balance of the Municipality is Rs6,873 including a sum of Rs5,050 invested in the 6½ % loan.

5. According to the draft budget for the next year prepared for consideration at this meeting, it is found that excluding the income from tolls, the establishment of which is pending sanction of Government, the estimated normal revenue for next year will be Rs21,000, and ordinary expenditure Rs22,000, resulting in a deficit of Rs1,000. The income from tolls is expected to amount to only Rs2,000 per annum and as against this item there will be some additional expenditure under Public Works towards the [illegible] and for [illegible] Municipal limits.

The Council have to consider whether selling away certain [illegible] for the new project is a [illegible] advantage but if [illegible] secured

[illegible] the Municipality may not immediately get more [illegible] a couple of thousands of rupees. There are heavy arrears under Conservancy and Slaughter house fees and by taking energetic steps it is possible we may expect to realise about Rs3 to 4 thousand rupees But this will take time and we cannot depend upon it for contributing funds for the water supply project

6 It seems to me that the only source which can be thought of at present for financing this project, is the raising of a loan on the guarantee of Government and I am sure all the members of the Council will agree in this view

7. The terms and conditions of the loan should be made sufficiently attractive in order to secure the required funds without undue delay The Mysore Government 7% ten year loan is quoted at a premium and if we offer the same rate of interest and fix the period of repayment at 15 years, our loan is bound to be successful There are a number of gentlemen of means in this town itself, who may be confidently expected to contribute to the loan within a month of floatation, if only some of the Municipal Councillors would kindly take up the lead

8 The question of providing for the payment of interest on the loan and for the sinking fund to ensure repayment on the due date was next to be considered The interest on Rs15,000 at 7% will be Rs1,050 and an annual provision of Rs1,000 towards the loan sinking fund has to be made during the currency of the loan The income from tolls is expected to amount to Rs2,000 which may be earmarked to provide for interest and as well as the sinking fund for the loan. The sinking fund will of course be kept separate from the current balances and invested in the Mysore Bank or in Government promotes and the interest earned on the sinking fund will go to make up deficiency if any in the expected toll revenue If not required for the purpose it will be available to supplement the allotment for public works

9 The supply of water in this town is free and no water tax is at present levied When the project now under contemplation is finalised and worked out and good filtered water is supplied, the question of levying water tax if any for supplying Municipal revenue may be considered

10 Coming with the question of finance the water

[illegible] of p[illegible]ing [illegible] and [illegible]ons for purchasing
[illegible] l[illegible] dispensary buildin[illegible] for Rs.15,000, as recently resolved
[illegible] the [illegible]unicipal Council However desirable it may be for the
[illegible]icipality to have this building for municipal purposes the mat-
[illegible] does not appear to be so urgent as to demand its financing by
[illegible]aising a loan in the open market especially in view of the difficit
[illegible]dition of the [illegible]unicipal Budget. And my suggestion on this subject
[illegible] that Government should be approached to treat the purchase money
[illegible] loan to the [illegible]unicipality on the security of the said building,
[illegible] be repaid in ten annual instalments interest being charged at a
concession rate of 5% per annum The annual instalment may amount to
1,000 roughly, and this should be provided for by corresponding re-
duction in the allotment for Public Works and retrenchment in the
other directions, total normal expenditure including this annual pay-
ment being kept well within the normal income excluding toll revenue

11 Next there is the question of taking prompt measures for improving the existing resources of the Municipality and for balancing the budget. For this purpose, it is necessary to constitute a strong Committee to investigate into the causes for the fall of income in recent years particularly under Octroi and suggest measures for improving revenue and for reducing all avoidable abnormal expenditure It may be considered whether in view of the heavy outlay consequent on the pur-
chase of the Female Dispensary building, construction on new public works on a large scale may not be stopped till the revenues improve

12. To sum up the proposals for consideration by the Council
are - (i) to undertake to provide at once the Municipal share of the project estimated at Rs15,000 by raising a loan within the Polar District

(ii) to approach Government for according sanction to the raising of a loan on Government guarantee the terms and conditions being as under -
(a) Loan to carry interest at 7% per annum, (b) loan to be repayable in 15 years, (c) interest and sinking fund to be provided for out of income from tolls,

(iii) to ask Government to accord sanction to the levy of tolls from the 1st July 1923. of hereafter

(iv) to request Government to permit the Municipality to repay the purchase money of the Female Dispensary building viz Rs 7,000 in ten instalments commencing from next year in addition with interest calculated at 5% per annum

(v) to constitute a strong Sub Committee to go into the question of [illegible] existing normal resources, investigate the causes of fall in income and suggest measures for [illegible] in the budget position

Polar,
22nd [illegible] 1923.

The Deputy Commissioner
Kolar District.

The President,
Kolar Municipal Council,
Kolar.

the 5th February 1923.

FILTER BEDS TO KOLAR TOWN.

With reference to the representation of the Municipal Council to the Dewan and his reply thereto in August last in the above matter, has the honor to request that pending receipt of a project from the Public Works Department, the Municipal Council may consider the ways and means for providing their share of the expenditure for the work which is estimated to be about Rs. 30,000.

2. As the Government will be apportioning their budget grants early in April 1923 and with a view to be ready with definite proposals in time, it is requested that the Municipal Council may discuss the whole question in detail and forward their proposals in the matter by at least by the end of the month

3. It is necessary that advantage should be taken of the generous promise of the Dewan and that with a view to ensure a favourable consideration to the project, the proposals of the Municipal Council should be submitted without delay.

4. Very early action is requested.

Sd S Mirâannaiya,
Deputy Commissioner,
Kolar District.

P. T.O.

Sir,

With reference to correspondence ending with your D.O.No.L.1657 dated 23rd August 1923, I have the honour to forward herewith for favour of obtaining sanction of government an estimate amounting to Rs 32,000 for improving water supply to Kolar Town.

2 A copy of my note on the improvements to Kolar water supply is enclosed.

3 The President, City Municipal Council, has countersigned the estimate amounting to Rs 32,000 comprising works of the first stage. The question having a balancing tank higher up referred to in the latter part of the Resolution will be taken up during the execution of the work.

I have the honour to be,
Sir,
Your most obedient servant,

4.9.23
Chief Engineer for Irrigation.

Order No L 2697-7 Dy Engineer's Estimate
2 Schedules 1 Estimate
1 Map 1 Report
in duplicate

In an address presented to His Excellency during his tour in August 1922 the Town Council of Kala urged the pressing need for an up to date filtered system of water supply to their town and as they were unable to carry out any scheme on the small income from their resources, they requested that His Govt may give them a grant or a loan, if necessary, for the purpose. His Excellency in his reply graciously was pleased to promise a Govt contribution of half the cost of the project for providing a sand filter for their existing water supply at a cost between Rs 2 Lakhs & Rs 3 Lakhs & the Council would be satisfied with a modest scheme

2. The Ch Engr who was asked to prepare a scheme for new sand filter states that in order to improve the whole system of water supply effectively & in a thoroughly satisfactory manner it will be necessary to carry out the
